

10) Editing Sprites

1) Click  to open a new sprite

- Select 'home' or 'my documents'

- Select a picture to import into Scratch (saved off the internet or from 'my pictures')

2) Once your picture is imported onto the stage, edit around this picture so the background is transparent by following these steps:

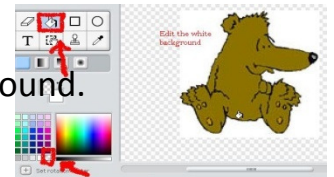

- Select the costumes tab

- Then select the image and click on edit

- Once in 'Paint Editor', edit your image so there is no white background.

EXTRA CHALLENGE:

Create and edit two of your own sprites using the paint button and create a script for each one.
